

EUROSIGN LCD 42 PRO

Networked Digital Signage

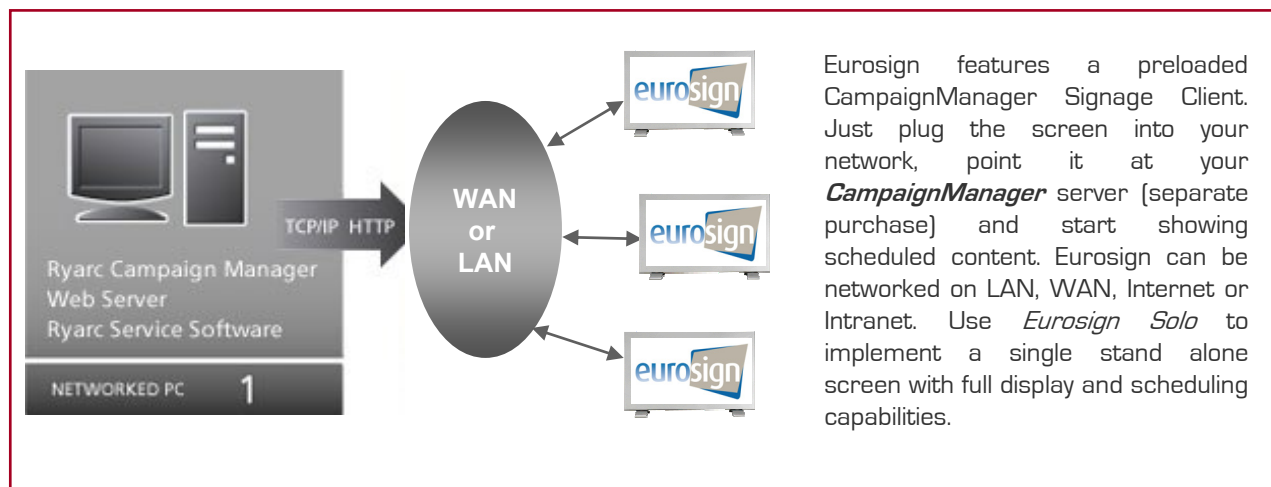

Wouldn't it be great if someone could provide a high impact, large format digital sign that integrated screen and media player in a single styled enclosure – just plug in the power, add broadband and go? What if you could deploy this level of digital signage at an economical site cost and control your new network with a standard webserver architecture?

This isn't just wishful thinking – It's now a reality. Radiant Europe introduces *EuroSign*, a range of high impact digital signage that sets new standards in performance and value.

Radiant Europe's digital signage solution harnesses the power of **Ryarc's CampaignManager**, networked digital signage software. Each display has an embedded XP platform, sophisticated media player technology and readily connects to a choice of network architectures.

- High Contrast, HD Resolution, Wide Screen Display
- Toughened Safety Glass Panel
- Modular integrated display engine with XP Pro Embedded
- Any content from pictures to HDTV
- Multiple Screen Zones, Tickers, RSS
- Powerful Signage Software – Network Ready
- Single enclosure supplied with wall mount kit
- Two Year Warranty

Eurosign features a preloaded CampaignManager Signage Client. Just plug the screen into your network, point it at your **CampaignManager** server (separate purchase) and start showing scheduled content. Eurosign can be networked on LAN, WAN, Internet or Intranet. Use *Eurosign Solo* to implement a single stand alone screen with full display and scheduling capabilities.

"Seeing is believing"

Contact us to arrange a demonstration of the brightest new digital signage solution.
